Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

Description

The XM-4000 photoluminescent tape is made from 100% polyester and has been certified to meet stringent safety standard as ISO 17398 (class C). This cutting-edge tape is designed to provide exceptional visibility in low-light conditions and ensure the safety of workers in various industries. XM-4000 ensures that workers remain easily seen even when light sources are limited or absent.

Product Construction

The construction of photoluminescent tape XM-4000 involves incorporating special dyes that have photoluminescent properties. These dyes absorb and store energy from ambient light. Once the light source is removed, the stored energy is released in the form of a vibrant glow.

Product Detailed Information

Material	100% Polyester
Finish	-
Colour	Glow Green
Industrial wash	-
Roll, Width	50 mm
Roll, Length	100 meters
Roll, Weight	2.55 kgs

Product Certifications

NFPA 2112	-
ANSI 107	-
CSA Z96	-
EN 20471	-
EN 469	-
EN 15384	-
DIN 67510-1	Class C
ISO 17398	Class C
OEKO-TEX 100	-
Certificate of Test	VTEC (USA), RISE (Sweden)

Shelf Life

Keep in cool dry place, with no direct sunlight. Use the product during 12 months from the date of purchase.
