Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

Description

Silver reflective tape with superior retro-reflective performance is best suited for Heavy duty EN 20471 workwear. It is made with polycotton backing. Maximum retroreflection is guaranteed even after numerous Industrial laundry cycles. High grade micro-beads provides extra visibility of workers. Available in 1", 2", 3", 4" width.

Product Construction

This Reflective Material is a Poly-cotton Fabric coated with a layer of resin with numerous glass micro-lenses impregnated with a special glue into this layer. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing reflective tape more visible in the dark.
