Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

Description

This silver reflective tape offers flame retardant protection certified by EN 469. It is also certified to EN 20471. It resists 180°C heat and limited influence of flame and continues to reflect and make wearer more visible at such conditions. It can be sewn on FR workwear, police/army or emergency.

Industrial or domestic wash. uniform.

Product Construction

This Reflective Material is a Textile Fabric coated with a layer of resin with numerous glass micro-lenses impregnated with a special glue into this layer. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing reflective tape more visible in the dark.
