Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

Description

Yellow reflective tape XM-6034 is made with poly-cotton backing. It is used for High Vis clothing and helps to increase visibility in a daylight and at nighttime. Polyester blended with cotton makes this reflective tape more durable, than pure cotton tape.

Product Construction

This Reflective Material is a Poly-cotton Fabric coated with a layer of resin with numerous glass micro-lenses impregnated with a special glue into this layer. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing reflective tape more visible in the dark.
