Composition	PVC (Vinyl)
Colour	Blue-Grey
Reflectivity	Ra>250 (Microprism)
Roll size	5 cm x 50 m
Certification	—
Washing performance	25x40°C

Blue-Grey checker Vinyl (PVC) reflective trim uses prismatic technology to enhance reflectivity in wet conditions. Numerous microprisms are safely protected under the layer of polymeric film, what allows for workers to be more visible under the rain. Custom colour and size available. Recommended to sew on reflective vests, jackets and other police uniform.

XM SilverLine Reflective tapes and films will have longer life if you follow our care instructions.

Type of work environment, exposure conditions and maintenance have an impact on reflective performance.

Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.
