## Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

## Description

Reflective tape XM-7010P is a Yellow-Silver FR-trim made of Meta-Aramid and perforated for better breathability. It offers inherent flame retardant protection proven by EN 469 certificate. Micro-holes allow more air-circulation and easier output of perspiration helping to the body to not be overheated. It can be sewn on firefighters uniform or fire-clothing.

## Product Construction

This Reflective Material is a Aramid Fabric coated with a layer of resin with numerous glass micro-lenses impregnated with a special glue into this layer. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing reflective tape more visible in the dark.
