	Iron	Iron at low temperature, 110°C

## Method of Application

Please contact us for instructions or check our web-site.

## Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

## Description

Silver aramid FR reflective tape offers excellent flame retardant protection. It is also fully compliant to EN 20471/ANSI 107. Designed for extra High Visibility and for max protection of people working at the risk of flame or open fire. For FR workwear, army/police, firefighters uniform.

## Product Construction

This Reflective Material is an Aramid Fabric coated with a layer of resin with numerous glass micro-lenses impregnated with a special glue into this layer. The light reflects from these micro-lenses and comes back to a car (or other sources of light) making the person wearing reflective tape more visible in the dark.

## Product Detailed Information

Material	100% Meta-aramid
Finish	-
Colour	Silver
Industrial wash	-
Roll, Width	50 mm
Roll, Length	100 meters
Roll, Weight	2.15 kgs

## Product Certifications

NFPA 2112	-
ANSI 107	-
CSA Z96	-
EN 20471	-
EN 469	-
EN 15384	-
NBR 15292	-
OEKO-TEX 100	Class 2
Certificate of Test	-

## Shelf Life

Keep in cool dry place, with no direct sunlight. Use the product during 12 months from the date of purchase.
