

## Description

This triple colour Yellow-Silver-Yellow trim is flame resistant and designed for Heat Transfer application on Firefighters clothing or FR-workwear. Segmented design of the tape gives more flexibility and improves air-circulation from the body of the wearer. Better breathability helps to not be overheated. XM-8010C is a high-tech material and its adhesive properties varies depending on type of fr fabric.

## Product Construction

This Reflective Material is a PU+Polyester resin with numerous glass micro-lenses impregnated into adhesive layer and placed on a film liner. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing reflective tape more visible in the dark.
