

## Description

Reflective tape XM-8011 in Silver colour with FR properties. Designed for Heat Transfer application on FR-workwear and Firefighters clothing. XM-8011 is a high-tech material and its adhesive properties varies depending on type of fr fabric. We advise you before the first use to check the grip of the tape by applying it on a certain FR-clothing. It is also useful to make trial washes of fr-clothing with applied reflective tape.

## Product Construction

This Reflective Material is a PU+Polyester resin with numerous glass micro-lenses impregnated into adhesive layer and placed on a film liner. The light reflects from these micro-lenses and comes back to a car (or other sources of light) making the person wearing reflective tape more visible in the dark.
