

Description

Segmented reflective tape XM-8012C in Orange-Silver colour with Flame Resistant properties. Designed for Heat Transfer application on FR-workwear and Firefighters clothing.

Product Construction

After 25 washes at 60oC, the tape has met the requirements of Flammability test (ISO 15025, Edge ignition) and Retro-reflectivity test (Ra=448).

It is planned that XM-8012C would pass EN 469 & EN 20471 certification after 25 wash cycles at 60oC.

Product Detailed Information

Material	FR PU+Polyester
Finish	Flame retardant
Colour	Orange 50 mm / Silver 20 mm
Reflectivity, R	400 cd/m ²
Industrial wash	-
Roll, Width	50 mm
Roll, Length	100 meters
Roll, Weight	2.4 kgs

Product Certifications

EN 20471	-
EN 469	-
NFPA 2112	-
NFPA 1971	-
NBR 15292	-
OEKO-TEX 100	Class 2
Certificate of Test	-

Method of Application

Please contact us for instructions or check our web-site.

Shelf Life

Keep in cool dry place, with no direct sunlight. Use the product during 12 months from the date of purchase.

Care Instructions

	Wash	Machine Wash Warm, 40°C
	Bleach	Do not bleach
	Dry	Tumble Dry Low, 55°C
	Dry-clean	Do not dry clean
	Iron	Iron at low temperature, 110°C

Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.
