Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

Description

Reflective tape XM-8104/10 in Yellow colour with Flame Resistant properties. Designed for Heat Transfer application on FR-workwear and Firefighters clothing. XM-8104/10 is a high-tech material and its adhesive properties vary depending on type of FR fabric. We advise you before the first use to check the grip of the tape by applying it on a certain FR-clothing. It is also useful to make trial washes of FR-clothing with applied reflective tape.

Product Construction

This Reflective Material is a PU+Polyester resin with numerous glass micro-lenses impregnated into the adhesive layer and placed on a film liner. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing reflective tape more visible in the dark.
