## Description

Silver reflective tape with superior retro-reflective performance is best suited for EN 20471 vests, jackets, pants etc. It is made with polycotton backing. Maximum retroreflection is guaranteed even after numerous wash cycles. High-grade micro-beads provide extra visibility of workers. Available in 25, 50, 70 mm (1", 2", 2.75").

## Product Construction

This reflective material is a poly-cotton fabric coated with a resin layer in which numerous glass micro-lenses are embedded with a special adhesive. The light reflects from these micro-lenses back to the light source (car headlights etc.), making the person wearing reflective tape more visible in the dark.

## Product Detailed Information

|                 |                           |
|-----------------|---------------------------|
| Material        | 65% Polyester, 35% Cotton |
| Finish          | -                         |
| Colour          | Silver                    |
| Industrial wash | -                         |
| Roll, Width     | 50 mm (available 25, 70)  |
| Roll, Length    | 100 meters                |
| Roll, Weight    | 1.6 kg                    |

## Shelf Life

Keep in a cool, dry place away from direct sunlight. Use the product within 12 months of the date of purchase.

## Care Instructions

|                                                                                     |           |                                |
|-------------------------------------------------------------------------------------|-----------|--------------------------------|
|  | Wash      | Machine Wash Hot, 60°C         |
|  | Bleach    | Do not bleach                  |
|  | Dry       | Tumble Dry Low                 |
|  | Dry-clean | Dry clean, PCE only            |
|  | Iron      | Iron at low temperature, 110°C |

## Method of Application

Please contact us for instructions or check our website.

## Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.
