

Care Instructions

	Wash	Machine Wash Warm, 40°C
	Bleach	Do not bleach
	Dry	Tumble Dry Low, 55°C
	Dry-clean	Do not dry clean
	Iron	Iron at low temperature, 110°C

Method of Application

Please contact us for instructions or check our website.

Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

Description

Reflective tape XM-8104/10 in Yellow colour with Flame Resistant properties. Designed for Heat Transfer application on FR-workwear and Firefighters clothing. XM-8104/10 is a high-tech material and its adhesive properties vary depending on type of fr fabric. We advise you before the first use to check the grip of the tape by applying it on a certain FR-clothing. It is also useful to make trial washes of fr-clothing with applied reflective tape.

Product Construction

This reflective material is a PU+polyester resin with numerous glass micro-lenses embedded in the adhesive layer and placed on a film liner. The light reflects from these micro-lenses back to the light source (car headlights etc.), making the person wearing reflective tape more visible in the dark.

Product Detailed Information

Material	FR PU+Polyester
Finish	Flame retardant
Colour	Yellow
Industrial wash	-
Roll, Width	50 mm
Roll, Length	100 meters
Roll, Weight	2.715 kg

Product Certifications

NFPA 2112	UL (USA)
ANSI 107	-
CSA Z96	-
EN 20471	80×40°C, 50×60°C ISO 6330
EN 469	80×40°C, 50×60°C ISO 6330
EN 15384	80×40°C, 50×60°C ISO 6330
EN 11612	50×60°C ISO 6330
OEKO-TEX 100	Class 2
Certificate of Test	Aitex (Spain), UL (USA)

Shelf Life

Keep in a cool, dry place away from direct sunlight. Use the product within 12 months of the date of purchase.
